

The Sideshift Advantage

Sideshift's family of rugged Bow and Stern Thrusters give you unparalleled control when docking in windy or water current conditions, turning tight corners or navigating narrow waterways. Designed for all types of boats to 50 feet in length or more, the thrusters are easily mounted externally to the hull or swim platform. No expensive tunnel is required.

The water cooled DC motors are silent and powerful. With a simple touch of the joystick, sideways movement is immediate as the 8 inch propellers quickly pull the boat through salt or fresh water.

Installation is straight forward, typically requiring less than a day. Packaged as an all-inclusive kit, the thruster, controller, mounting hardware, and joystick are all provided. Since all mounting bolts are located above the waterline, Sideshift's thrusters can be even installed while the boat is in the water. Simply connect to your boat's power source and you will be on your way to amazing boating!

Selecting which thruster is right for you is as easy as determining your boat's length:

Model #	Bow or Stern	Boat Length
SS230	Bow	20 – 30 ft (6.1 – 9.1 m)
SS340	Bow	30 – 40 ft (9.1 – 12.2 m)
SS350	Bow	40 – 50 ft (12.2 – 15.2 m)
ST340	Stern	20 – 40 ft (6.1 – 12.2 m)
ST350	Stern	40 – 50 ft (12.2 – 15.2 m)

7 Great Reasons to Install Sideshift

- **Dock with Confidence.** Sideshift's Bow and Stern Thrusters make docking your boat as easy as parking your car. Stress-free docking!
- **Maneuverability.** Sideshift's thrusters are mounted as far front and back as possible. This makes the boat very easy to move sideways or to turn in a tight spot.
- **DIY Installation.** Detailed installation instructions with step-by-step photos have been easily followed by thousands of boat owners. Save hundreds of dollars or more by installing them yourself. You can do it!
- **No holes below the waterline!** All mounting holes are *above* the waterline. Sideshift's Bow and Stern Thrusters can be even installed with the boat in the water!
- **Rugged and Reliable.** For over 10 years, Sideshift's Bow and Stern Thrusters have been made in North America of high quality aluminum to demanding Canadian standards. Proven reliable in both fresh and salt water!
- **Water Cooled & Quiet.** The compact 12V or 24V electric motors are water cooled and extremely quiet.
- **Drag-free.** Located just inches below the water surface, Sideshift's motors and propellers rise out of the water when the boat planes.
