

HB340

Benefits

- **Fully Retractable Actuation System**
- **Proven 5hp Thruster Technology for Instant Response**
- **Fast 3 Second Deployment and Retraction**
- **Easy DIY Installation**
- **Whisper Quiet**
- **Rugged and Reliable**
- **In-Water installation possible**

DESCRIPTION

The HB340 Houseboat Thruster from Sideshift is perfect for houseboats between 30' and 50' in length. The powerful 5.0 horsepower, dual prop thruster is mounted to the underside of the deck at the bow to provide a strong pivot point advantage for optimum control in any weather.

To deploy, simply press the helm-mounted actuator switch and within seconds the HB340 drops down into position, stopping automatically at the perfect depth. From here precision guidance is right at your fingertips with the simple joystick control to swing your bow in any direction, regardless of wind or current. An audible alarm and position sensor ensure operator awareness of the thruster at all times, preventing accidental damage.

Saltwater proven, whisper quiet and water-cooled, the HB340 Houseboat Thruster features two rugged 8" aluminum props, marine-grade anodized aluminum housing and stainless steel hardware. Shipped as a complete kit with thruster, controller, joystick, wireless remote key fob, wiring harness and mounting hardware, installing the HB340 Houseboat Thruster takes only a few hours and can be done either in-water or on-land.

TECHNICAL DATA	
Typical Boat Size	Boats from 30'(9m) to 50'(15m) in length
Motor Voltage	12 VDC
Motor Amperage	300 Amps
Motor Horse Power	5 HP
Motor Revolutions	3000 RPM
Motor Duty Cycle	Run time 30 sec Cool down 10 sec
Propulsion System	Dual 8" Propellers
Joystick Voltage	12V or 24V
Exterior Finish	Interlux Protect 2000 Epoxy Primer and Tri-Lux 498 Anti-Fouling Paint
Battery Requirements	Two 12V 850CCA Starting Type or Gel Cell Batteries

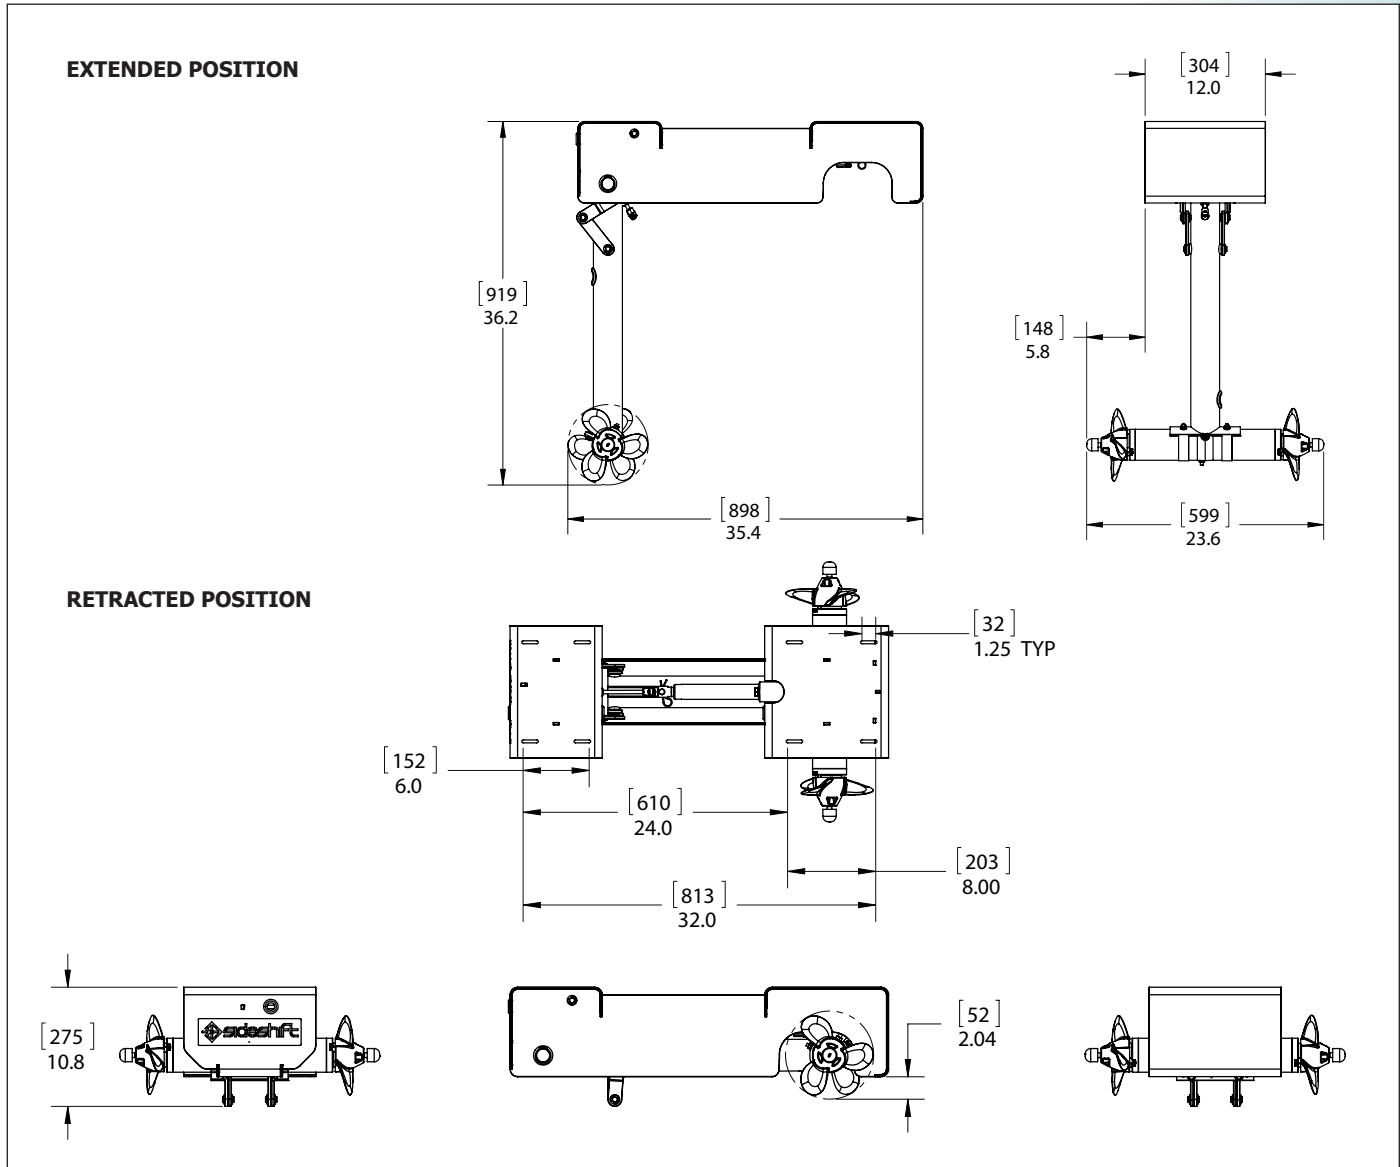

Kit Contents:

- Dual Prop Thruster
- 25' Wiring Harness
- Motor Controller
- Helm-Mounted Joystick/Actuator Switch
- Mounting Hardware
- Installation Manual
